| IITR-AIML-TA-I-2606 | 2026-11-18 | Wednesday | Academic Session 32 - Master Class: Vectors & Linear Algebra: The Mathematics of Space and Direction | 18 | Add, subtract, and scale vectors both geometrically (arrows) and numerically. Compute the magnitude of a 2D and 3D vector using Pythagoras. Calculate the dot product of two vectors by hand. Use the dot product formula to find the angle between two vectors. Explain geometrically what it means for two vectors to be perpendicular (dot product = 0).                                                                           | Abhinandhan | 2   | 20:00:00 | 22:00:00 | Academic         |  |  |  |  |

| IITR-AIML-TA-I-2606 | 2026-12-01 | Tuesday   | Academic Session 35 - Building AI Workflows in LangChain                                             | 20 | Build extraction and summarization workflows using LangChain chains and output parsers; design a simple FAQ bot and CSV copilot using LangChain pipeline patterns; construct multi-step AI pipelines that pass structured outputs between steps                                                                                                                                                                                       | Aswath Rao  | 2   | 20:00:00 | 22:00:00 | Academic         |  |  |  |  |
| IITR-AIML-TA-I-2606 | 2026-12-02 | Wednesday | Academic Session 36 -Master Class : Calculus Intuition - Change, Slope & Optimisation                | 20 | Compute the average rate of change of a function between two points. Explain what a derivative is using only the tangent line picture — no epsilon-delta. Apply basic derivative rules to simple polynomials by hand (e.g., $f(x) = 3x^2 + 2x + 1$ ). Find the minimum or maximum of a simple function by setting its derivative to zero. Explain in plain language why "setting the derivative to zero" finds the bottom of a curve. | Abhinandhan | 2   | 20:00:00 | 22:00:00 | Academic         |  |  |  |  |
